This health and safety specifications, the approved health and safety plan as well as the Occupational Health and Safety Act (Act No. 85 of 1993), shall be kept on the construction site and made available for inspection by employees, inspectors and other persons entering the site of works.

The specifications will apply for the duration of the project, compliance with the specifications will not absolve the principal contractor from complying with any other minimum legal requirements and the principal contractor will carry full responsibility regarding the adherence to the health and safety specifications and ensure the health and safety of his employees and any sub-contractors used to carry out construction work on the project.

It must be noted that the Employer or its representative may stop the contractor from executing construction work, which is not in accordance with the Employer's health and safety specifications for the project, or which poses a risk to the health and safety of any persons on the construction site.

3. TENDERS

The Contractor shall submit the following with this tender:

- a) A documented Health and Safety Plan as stipulated in Regulation 5 of the Construction Regulations. These specifications form the basis of the Health and Safety Plan which must be in line with the Construction Regulations and will be subject to approval by the Employer;
- b) as an annexure to the health and safety plan, a detailed health and safety policy outlining the Contractor's stance on and principles adopted for health and safety;
- c) as an annexure to the health and safety plan, a declaration to the effect that he has the competence and necessary resources to carry out the work safely in compliance with Construction Regulations;

d) proof or demonstration to the Employer that as the Contractor, he has made sufficient provision for the cost to implement and maintain the health and safety plan proposed by themselves (Contractor) to meet the requirements of this health and safety specification as well as that of the OHSACT and its Regulations as required by Construction Regulation 4(1).

Failure to submit the foregoing will lead to the conclusion that the Contractor will not be able to carry out the work under the contract safely and in accordance with the OHSACT and its Regulations.

4. SPECIFICATIONS

4.1 Notification of Construction Work (attached Annexure 2)

After award of the contract but before commencement of the construction work, the Contractor shall in terms of Construction Regulation 3 (1), notify the Provincial Director of the Department of Labour in writing if the construction work involves the following:

- a) the demolition of structures and dismantling of fixed plant at a height of 3 meters or more;
- b) the use of explosives in carrying out construction work;
- c) excavation work deeper than 1 meter;
- d) working at a height greater than 3 meters above ground or landings;
- e) exceeds 30 days or will involve more than 300 person days of construction work.

The notification to the Provincial Director must be done on the attached Annexure 2, the Contractor shall ensure that the completed and signed form (Annexure 2) is kept on site for inspection by an inspector, client, client's agent or employees on site.

4.2. Management and supervision

For this contract the Contractor will be mandatory of the Employer as defined in the OHSACT, which means the contractor has the status of employer in his own right in respect of the contract.

Before commencement of the work under the contract, the Contractor shall enter into an agreement with the Employer, as per attached Annexure 1, to confirm his status as mandatory (employer) for the contract under consideration as required by Section 37 of the OHSACT.

The Contractor shall appoint competent persons to manage and supervise construction work as required in terms of Construction Regulation 6. Appointments of these personnel and employees does not relieve the Contractor from any of the obligations under Construction Regulation 6.

The Contractor shall ensure that all construction work is carried out under the supervision of competent persons at all times. Any afterhours work shall be done under the supervision of competent persons.

4.3. Contractor agreements with mandataries, contractors and subcontractors

Any sub-contractors employed by the Contractor must be appointed in writing, setting out the terms of the appointment in respect of health and safety as per OHSACT Section 37 (1) and (2). An independent sub-contractor shall however provide and demonstrate to the Contractor a suitable, acceptable and sufficiently documented health and safety plan before commencement of the sub-contract. In the absence of such a health and safety plan the sub-contractor shall undertake in writing that he will comply with the Contractor's safety plan, the health and safety specifications of the Employer and the Construction Regulations.

4.4 Registration with the Compensation Commissioner

The Contractor has to comply with the Compensation for Occupational Injuries and Diseases Act of 1993 (No. 130 of 1993), which ensures compensation for disablement caused by occupational injuries or diseases sustained or contracted by employees in the course of their employment, or for death resulting from such injuries or diseases.

4.5 Appointments and requirements

Health and safety induction training

The Contractor shall ensure all employees under his control, including sub-contractors and their employees undergo a health and safety induction training course by a competent person before commencement of construction work. No visitor or other person shall be allowed or permitted to enter the site of the works unless such person has been inducted on the health and safety pertaining to hazards and risks prevalent on the site.

The Contractor shall ensure that all work in confined spaces is carried out in terms of the requirements of General Safety Regulation 5.

4.15 Working on or close to water

The Contractor shall ensure that all work undertaken over or in close proximity to water complies with all provisions of Construction Regulation 4.

4.16 Use and temporary storage of hazardous chemicals

The Contractor shall ensure that the usage and storage of hazardous chemicals on site is closely monitored. A proper register of the use and storage should be kept and regularly updated. Strict compliance with the Hazardous Chemical Substances (HCS) Regulations as well as Construction Regulation 23 should be adhered to at all times.

4.17 Welfare facilities

The Contractor shall ensure that all welfare facilities for employees and other persons coming on site adhere with construction site provisions in the Facilities Regulations and the provisions of Construction Regulations 28.

4.18 HIV/AIDS Awareness Programme

The Contractor shall implement an HIV/AIDS awareness programme for all employees. Please refer to the attached Annexure 3 (HIV/Aids awareness programme specifications)

4.19 Reporting of incidents

The Contractor shall report all incidents occurring at the workplace as contemplated in Section 24 of the OHSACT and General Administrative Regulations 8. The Contractor shall obtain an incident record book, in the form of Annexure 1 of the General Administrative Regulations, where he shall record all incidents occurring at the workplace.

4.20 First aid

The Contractor shall ensure that all first aid requirements are met as per General Safety Regulations.

4.21 Emergency procedures and fire protection.

The Contractor shall ensure that an evacuation plan is drawn up for cases of emergency. A safe assembly point shall be established on site. Emergency procedures shall be communicated to all employees, contractors and the professional team during induction.

The necessary precautions should be taken to prevent the incidence of fires on site, adequate and sufficient fire protection equipment, sirens, fire drill and escape routes should be available.

All emergency procedures and fire protection procedures should be in accordance with Environmental Regulation 9 and Construction Regulations 27.

4.22 Special permits

Where special permits are required before work may be carried out such as occupancy certificates for employees staying on site, the Contractor shall apply to the relevant authority for such permits to be issued. The Contractor shall comply with the conditions and requirements pertaining to the issue of such permits.

4.23 Health and Safety File

The Contractor shall ensure that a health and safety file is opened and kept on site. This shall include all documentation as required by the OHSACT and applicable Regulations. The file should always be made available to the inspectors, contractors and the professional team as and when required during the construction period. The Contractor shall upon completion of the construction work, hand over a consolidated health and safety file (which in addition to the documentation mentioned in the OHSACT and applicable Regulations include a record of all drawings, designs, materials used and other similar information concerning the completed project) to the Project Manager for the Employer's safe keeping for a minimum period of 18 years.

5. CONCLUSION

The forgoing is a summary of the OHSACT and applicable Regulations applicable to construction projects. The Contractor as employer for the execution of the contract, shall ensure that all provisions of the OHSACT and Regulations applicable to the contract under consideration are complied with fully. Should the Contractor fail to comply with the provisions of the OHSACT and applicable Regulations, he will be guilty of an offence and will be liable, upon conviction, to the fines or imprisonment as set out in Construction Regulation 30.
